

## **AUTOMATIC RETRACTABLE AWNING**

### **ABSTRACT OF THE DISCLOSURE**

An automatically extendible and retractable awning includes an awning sheet mounted along one edge to a support structure and at an opposite edge to a roll bar about which it can be selectively wrapped. Each end of the roll bar is supported by a scissors type support structure allowing the awning to be extended and  
5 retracted in a simple but effective manner while allowing considerable space for movement of individuals around the awning.
